Education

Bachelor of Science in Computer Science at the University Of the People

Expected to graduate in 2023

High School Diploma

Graduate from high school of the science discipline

2018 - 2019

Relevant Experience And Some Projects Built.

Built a Netflix clone with react.js

This project was built with React, it streamlines the various benefits when using React to build a project. used Axios to fetch movie data from an API provided by TMDB.

Colour theme switcher Country App

The Country app design was obtained from the frontend mentor platform. this project also uses an API to fetch the country data provided by [restcountry.eu]. React Context API was used to build the data layer of this project. Styled components are used for styling.

Spotify Clone

This was probably the most challenging. I used the Spotify API to build this project using react. backend functionality such as login in and authentication is provided by firebase. firebase was also used in hosting this masterpiece.

Skills

- HTML5, CSS3 and vanilla javascript, ES6, as well as JQUERY.
- React js is the main javascript library for building user interfaces.
- Other Skills include firebase and commerce js for implementing back end functionality.
- Bootstrap for building responsive responsive websites as well as styled components for styling.
